

REMARKS

By the foregoing amendment, certain of the claims have been amended to provide for the alternative use of fingerprint technology.

Support for such amendments is found in the 4th-to-last paragraph of the spec, which notes:

For example, while the detailed description focused on digital watermarks to convey auxiliary information with audio and video content, other techniques can be used as well (e.g., VBI, digital fingerprints, header meta data, etc.).

The amendments do not alter the Suggested Restriction Requirement submitted earlier.

Favorable consideration is solicited.
